

Manual Antenna Stand MAS 3162

Technical Data

For antenna ETS (EMCO) 3162-01	
Load capability	max. 30 kg
Antenna height adjustable manually	1.0 m to 1.5 m
Height adjustment by hydraulic cylinder	
Polarisation manually	0°/90° (vert./hor.)
With hand wheel	
Tilt angle manual adjustable	0° to 30°
Material	Aluminium
Temperature range	+10 °C...+35 °C

Brief description

The Manual Antenna Stand **MAS 3162-01** is specifically designed for measurements in electromagnetic absorption chambers at a fixed measuring height of the antenna ETS (EMCO) 3162-01.

Polarisation change is performed manually from 0° to 90°. The antenna bar height is manually adjustable by a hydraulic cylinder from 1.0 to 1.5 m. The antenna can be tilted by 30°.

The antenna rotates during polarisation around their axis to eliminate any elevation errors.

Information presented enclosed is subject to change as product enhancements are made regularly. Pictures included are for illustration purposes only and do not represent all possible configurations.
