Brief description

The turntable TT 0.3 PF is especially designed for freestanding installation on surface floor in electromagnetic absorption chambers. The carrier plate is made of integral skin-foam sheets made of rigid PVC. A 50 mm diameter opening in the centre of the turntable provides the capability to insert power supply for testing.

The IEEE 488.2 (GPIB) bus provides an additional control option for all functions, when operated with the SCU/MCU or NCD Controller.
